

THE FIRST NATIONAL BANK

OF SANTA FE.

The oldest banking institution in New Mexico. Established in 1870.
RUFUS J. PALEN, President. JOHN H. VAUGHN, Cashier.
LEVI A. HUGHES, Vice President. ALFRED H. BRODHEAD, Assistant Cashier.

Capital \$150,000. Surplus and Undivided Profits \$55,000.

Transacts a general banking business in all its branches. Loans money on the most favorable terms on all kinds of personal and collateral security. Buys and sells bonds and stocks in all markets for its customers. Buys and sells domestic and foreign exchange and makes telegraphic transfers of money to all parts of the civilized world on as liberal terms as are given by any money-transmitting agency, public or private. Interest allowed on time deposits at the rate of three per cent per annum, on a six month or year's term. Liberal advances made on consignments of live stock and products. The bank executes all orders of its patrons in the banking line, and aims to extend to them as liberal treatment in all respects, as is consistent with safety and the principles of sound banking. Safety Deposit boxes for rent. The patronage of the public is respectfully solicited.

NEW MEXICO MILITARY INSTITUTE

ROSWELL, NEW MEXICO.

THE MILITARY SCHOOL OF NEW MEXICO

Established and Supported by the Territory.

EIGHT MEN INSTRUCTORS, all graduates of Standard Eastern Colleges. New buildings, all furnishings and equipments modern and complete; steam-heated, electric-lighted, baths, water-works, all conveniences. **TUITION, BOARD AND LAUNDRY**, \$250 per session. Session is three terms of thirteen weeks each. **ROSWELL**, is a noted health resort, 3,700 feet above sea level; well-watered. Sunshine every day from September to June. **REGENTS**—Nathan Latta, W. M. Reed, W. M. Atkinson, W. A. Finley and E. A. Caboon. For particulars address **COL. J. W. WILLSON, Supr.**

OJO CALIENTE HOT SPRINGS.

These Celebrated Hot Springs are located in the midst of the Ancient Cliff Dwellers, twenty-five miles west of Taos, and fifty miles north of Santa Fe, an about twelve miles from Baranca Station on the Denver and Rio Grande Railway, from which point a daily line of stages runs to the springs. The temperature of these waters is from 90 to 122 degrees. The gases are carbonic. Altitude, 6,000 feet. Climate very dry and delightful the year round. There is now a commodious hotel for the convenience of invalids and tourists. These waters contain 1,636.24 grains of alkaline salts to the gallon, being the richest alkaline Hot Springs in the world. The efficacy of these waters has been thoroughly tested by the miraculous cures attested in the following diseases: Paralysis, Rheumatism, Neuralgia, Consumption, Malaria, Bright's Disease of the Kidneys, Syphilis and Mercurial Affections, Scrofula, Catarrh, La Grippe, all Femal Complaints, etc., etc. Board, lodging and bathing \$2.50 per day; \$14 per week; \$50 per month. Stage meets Denver trains and waits for Santa Fe train upon request. This resort is attractive at all seasons and is open all winter. Passengers for Ojo Caliente can leave Santa Fe at 9 a. m., and reach Ojo Caliente at 4 p. m. the same day. Fare for round trip from Santa Fe to Ojo Caliente, \$7.40. For further particulars, address

BARGAINS IN ORCHARDS AND RANCHES

Located in the Fruitful and Far Famed Espanola Valley Thirty Miles North of Santa Fe.

The following orchards and farm properties in the famed and fruitful Espanola Valley in southern Rio Arriba County in the Territory of New Mexico, are for sale at a bargain. There are satisfactory reasons for selling. The section is one of the finest fruit and agricultural, not only in New Mexico, but in the southwest. The supply of water for irrigation purposes is ample and stable at all times. The climate is of the best. For particulars address R. C. Bonney, real estate and insurance agent, Espanola, New Mexico. The properties are:

No. 1, 45 acres; 15 acres in alfalfa, one acre bearing orchard; small house, well, barn and corral; all fenced and under irrigation; one mile from post office, two and a half miles to railroad station; price \$30 per acre.

No. 2, Full bearing orchard of 1,200 standard apple trees; six miles from Espanola; good house, barn, corral and packing house; produced 2,500 boxes of apples last year; irrigation from Rio Grande; price \$2,000.

No. 3, Seven acre orchard and market garden tract, one-half mile to town, railroad, postoffice, school and church; good six room house, having telephone; barn, corral, cellar and packing house; a highly profitable business and a fine home; produces annually \$700 to \$800 in vegetables alone; price \$2,250.

No. 4, For sale sheep ranch of 520 acres with good fences and improvements, has excellent water, shelter, hay land and controls several thousand acres of fine good grazing land. No better proposition for a paying sheep ranch in New Mexico.

No. 5, Twenty acres, having about ten acres of full bearing apples of standard varieties, peaches and plums, seven acres of good alfalfa and three acres garden land, good five room adobe house, well built and finished, good barn; the whole place almost entirely surrounded by a hedge of box elder trees which serve as a protection from the wind and add to the attractiveness of the place; produced last year over \$1,200; price \$2,250; one and a fourth miles east of Espanola.

No. 6, The "Espanola Garden," one half mile east of Espanola at \$2,250. This place is a full bearing apple orchard and market garden tract of seven acres; a six room house; telephone, barn, cellar, packing house, corral and wire fence and house for chickens. A beautiful and convenient home and a place to make good money, besides applies this place has cherries, pears, plums, quinces and large beds of asparagus, spinach and rhubarb. The vegetable products alone of this place bring in annually \$750 to \$800. The net receipts last year in vegetables and fruit were over \$500. Terms cash.

ANNUAL MEETING.

Benevolent and Protective Order of Elks, Denver, Colorado, July 16-21.

For the above occasion, the Santa Fe will sell tickets to Denver and return at the rate of one fare \$16.90, for the round trip. Dates of sale July 13th, 14th and 15th. Good for return passage until August 20th. Low rates from all points on the Santa Fe to Denver. H. S. LUTZ, Agent.

TO LOUISVILLE, KY.

The Santa Fe Central Railway Company, in connection with the El Paso & Southwestern Railway and the Chicago, Rock Island & Pacific Railway Company will sell round trip tickets on June 11th, 12th and 13th to Louisville, Kentucky, with final return limit of 30 days for \$46.10, on account of home coming work for Kentuckians. Try our line. Call on or address, S. B. Grimshaw, General Passenger Agent.

WANTS

FOR RENT—Nice front room at 110 Grant Avenue.

WANTED—A position by competent bookkeeper, 5 years' experience. Best of references. Address Mary Cameron, Central Lake, Michigan.

WANTED—At once, rags, rags, cotton rags at the New Mexican office. Cash paid for rags.

ROLLER FLOUR MILL FOR SALE. Machinery complete, including boiler and engine for 30 barrel roller flour mill. Address, Martin Lohman, Las Cruces, New Mexico.

HOUSES TO RENT.

Houses to rent, lease or for sale, furnished or unfurnished, good locations. Call on the reliable firm, Hughes & Delgado. Office west side of Plaza.

FOR RENT—No. 106 College St., 6 rooms, hardwood flooring, electric light, water connection; \$10 per month. R. C. Gortner, Secretary.

FINE FRUIT RANCH FOR SALE.

One of the best fruit ranches in northern Santa Fe County, about twenty miles from this city, is for sale, at a bargain. For particulars apply to Max Frost, Box No. C-2, Santa Fe, New Mexico.

SANTA FE EXCURSION

RATES EAST
Summer rates have been made by the Santa Fe to points in the states of Illinois, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, South Dakota, Memphis, Tenn., Wisconsin and Wyoming.

These rates are a little more than one fare for the round trip. The round trip rate to Chicago being \$48.35, Kansas City \$55.85, St. Louis \$43.35, Memphis \$45.50. Dates of sale, June 1st and 2nd, June 9th to 18th, July 1st to 10, good for return passage until October 31st, for particulars call on agents of the Santa Fe.

H. S. LUTZ,
Agent, Santa Fe, N. M.

AN OPPORTUNITY FOR SMALL INVESTORS.

There is no surer or safer investment than good inside City Property, but it takes money to handle propositions like this, and the man with small capital is barred. Growing new towns, with conditions favorable to permanency afford an opportunity to the small investor to place his savings where his money will earn a handsome profit, equal in proportion to that of his more fortunate brother with larger means. This chance is offered at

WILLARD

THE GATEWAY

Which has all the things necessary for the building of a good, substantial town, including water of good quality, abundant in quantity at a depth of 35 feet below the surface, located in the finest section of grazing country in the Southwest with agriculture in its infancy; as fine an all around climate as there is in the world, with a pushing, energetic class of citizens and two railroads, one the new A. T. & S. F. Short Line to the Pacific. Willard has made a most phenomenal growth and the price of lots will soon advance. Better come now. The townsite is owned by

Willard Town and Improvement Company.

JOHN BECKER, Pres. and Gen. Mgr.

WM. R. BERGER, Secretary.

Call on or address JOHN W. CORBETT, Agent, Estancia, New Mexico.

LOUIS C. BECKER, Treasurer. Carl A. Dalles, Manager of The John Becker Co. Stores at Willard, has charge of the sale of lots in the absence of Mr. Corbett.

A NEW MEXICO COAL MINE.

THE COAL FIELDS OF COLFAX COUNTY

The Fuel in Sight That Can Be Mined Profitably Is Worth One Hundred Times as Much as the Assessed Valuation of Territory--Within Two Years Mines Will Produce Ten Million Tons a Year.

(Continued from Yesterday.)

Van Houten Mine.

The Van Houten mine, heretofore known as the Willow mine, is located in Sections 34 and 35, Township 30 North, Range 22 East New Mexico principal base and meridian; J. Van Houten is the general manager. The mine is situated about fourteen miles southwest from Raton and about nine miles from Hebron Station on the Atchison, Topeka & Santa Fe Railroad. A branch railroad was completed and operation commenced December 1, 1902, since which date the Willow, or Van Houten mine, has been one of the largest and steadiest coal producers in New Mexico. The coal is a good quality of bituminous coal, from which a good quality of coke is made, the slack being hauled by railroad to the washery and coke ovens at Gardiner, New Mexico.

The seam is from six to eleven feet in thickness and lies nearly horizontal, dipping one and a half per cent to the northwest. Three openings are being worked, one upon the north side and one upon the south side of Spring Gulch, about one-half mile west of the junction with Willow Creek. Upon the north side of Spring Gulch the coal seam is from six to eleven feet in thickness of clean, marketable coal, averaging about nine feet. On the south side of Spring Gulch the coal seam shows a parting of bone or shale four feet in thickness, leaving from four and one-half to five feet of clean coal, both above and below. Another opening is operated upon the same coal seam about three-fourths of a mile south from the openings on Spring Gulch. This opening is situated upon the main fork of Willow Creek. The general characteristics of the coal seam at this point are similar to those described on the south side of Spring Gulch. These three openings are known collectively as the Van Houten mine.

This magnificent coal seam covers a known area of forty to sixty square miles through a formation apparently little faulted or disturbed. At many places throughout this area the coal seam is exposed by erosion of canons and gulches. At every place where an outcrop is found there is seen the same uniformity as to the size of coal seam, and apparently little disturbed bedding plane. Electric power is employed for haulage, running fans, etc. Three electric generators and two ventilating fans are in use. Three steam engines are in commission, producing a total of 550 horse power. Three motors are used to haul the coal from the partings in the mine to the tipples—one 10-ton Jeffrey motor and two 15-ton Morgan-Gardner motors. The system of working is double entry, room and pillar. Average length of main drift entry, about 3,500 feet. Number of men employed underground, 278; number of boys employed underground, 5; average number of men employed outside, 20; average number of boys employed outside, 4. Nationality of employees, mostly Italians, Austrians and Germans, of the more intelligent and educated class, as evidenced by the fact that nearly all of them speak English and 90 per cent of them can read and write, as shown by signatures to vouchers. Number of days mine was operated during the past fiscal year, 261. Gross product of mine, in tons of 2,000 pounds, 390,000 tons; amount used in operating mine, 2,600 tons; net product, 387,400 tons; estimated value of net output of mine, \$184,250. At present the mine produces 1,500 tons a day, which can be increased to 2,500 tons when ever wanted.

The coal is sold to the Atchison, Topeka & Santa Fe Railroad and at various points throughout New Mexico, Arizona and Texas. From present indications the ratio of increase of production from these mines for the coming fiscal year will be much greater than for the year just past.

The Blossburg Mine.

The Blossburg Dutchman mine is situated in Dutchman Canon, about six miles by wagon road in a northwest-erly direction from Raton. J. Van Houten is the general manager. A spur of the Atchison, Topeka & Santa Fe Railroad connects the mine with the main line of railroad at Dillon Station. Like the other Blossburg mines, it is located upon what is locally known as the Raton vein, by some called the Blossburg vein. The coal is a good grade of bituminous coal, making a good grade of coke. The coal seam is from six to eight feet in thickness; dip of vein about one and one-quarter per cent northwest. The mine is worked on the double entry, room and pillar system. Th entries have been driven to a distance of 6,000 feet from the outcrop. The mine is ventilated by a 24-foot Guibal fan, exhaust, but reversible; capacity, 75,000 cubic feet per minute. The fan is run by an independent engine. One 550-volt 75-horse power Card generator furnishes the power for pumping and lighting, while tail rope haulage is operated from the mine partings to the tipples, the power being furnished by a 200-horse power steam engine. Average number of men employed outside, 10; average number of boys employed outside, 1; average number of men employed underground, 104; average number of boys employed underground, 1. The men are of various nationalities, Italians predominating. About 90 per cent of the employees can write, as shown by signatures to receipts and vouchers. The mine was operated 280 days during the past fiscal year; gross output, 210,000 tons; amount used in operating mine, 2,304 tons; net product of mine, 207,696 tons; estimated value of net product at mine, \$259,620. The net product shows an increase in tonnage over the preceding fiscal year of 171,982 tons. The coal is marketed in Arizona, New Mexico and Texas and is shipped from the mine via the Santa Fe system. The production of this mine has been restricted by reason of shortage of railroad cars and dearth of miners. The demand for the product of this mine is good and in excess of supply.

Extensive improvements have been made at the coke ovens at Gardiner, which are operated on slack from this mine and from the Van Houten mine. A new coal washery has been built for the treatment of the slack. The plant has a capacity of four hundred tons per day at present and the company intends doubling this capacity in the near future. One hundred new coke ovens are being built in addition to those now in operation. There is good reason to expect an increased

production from this mine during the ensuing year.

Brilliant Mine.

The Brilliant mine is located on the same branch as the Gardiner and Blossburg mines and J. Van Houten is its general manager. This is a new mine only recently developed. It is located upon the upper seam, known as the Tin Pan seam, which is six or seven hundred feet higher in the coal measures than the Blossburg seam, which is worked in the Blossburg Dutchman, Van Houten and Dawson mines. The coal is from 5 to 7 feet in thickness and the dip about one and a half per cent to the northwest. A drift entry has been driven 400 feet and development work is being prosecuted as fast as conditions allow. The mine is operated on the double entry, room and pillar system. Thirty-four men are employed underground at present and 50 men outside. The mine will be ventilated by an exhaust fan. As the pitch of the seam is light, the grades in the entries will allow of the economical use of mules for haulage, which will be the method employed for a considerable length of time. While the coal is of an exceptionally good coking quality, it still surpasses the product of the lower seam as a domestic coal. The analysis shows a higher percentage of fixed carbon and lower in ash than the coal from the lower seam. The mine is situated about five miles northwest from the Blossburg Dutchman mine. The company has erected shaking screens and other devices necessary to put the coal in the best possible shape to supply the demand for a first-class domestic coal.

Llewellyn Mine.

This mine is located about twelve miles northeast from Raton. It lies about 200 feet beneath the lava sheet which constitutes the top of Johnson Mesa. The coal seam outcrops in the several canons eroded along the sides of the elevation known as Johnson Mesa. The Santa Fe, Raton & Eastern Railroad has been built within a few miles of the property. The coal is a good quality of bituminous; thickness of vein, 7½ feet; lies nearly horizontal; system of working, drift, single entry, room and pillar; length of main drift entry, 550 feet; system of ventilation, air shaft.

Turner Mine.

The Turner mine is located about twelve miles northeast from Raton. Like the Llewellyn mine, it lies about 200 feet beneath the lava sheet. Thickness of coal seam, 4½ feet; kind of coal, bituminous; system of working, drift, room and pillar; ventilation by air shaft; length of main drift entry, 500 feet. The new camp of Yankee has been created near this mine within the past year.

Honeyfield Mine.

The Honeyfield mine is situated about nine miles northeast from Raton on the Santa Fe, Raton & Eastern Railroad. The coal is a good quality of bituminous; thickness of coal seam, 5 feet, nearly horizontal; system of working, drift, single entry, room and pillar; length of main drift entry, 250 feet.

Sperry Mine.

The Sperry mine is located about eleven miles from Raton. It is opened by a drift entry about 200 feet in length. The mine is on the Santa Fe, Raton & Eastern Railroad.

Climax and Sugarite Mines.

The Climax mine is located about one and one-half miles northwest of Raton. The product is a good grade of bituminous coal; thickness of vein, 1½ feet, nearly horizontal; system of

(Continued on Page Six.)

Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces. We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Sold by Druggists, or F. J. CHENEY & CO., Toledo, O. Take Hall's Family Pills for constipation.

WHAT WE WILL DO.
