Socorro West Mine Safeguard Project

Winner: Office of Surface Mining's 1999 Western Regional Award

These mines operated from 1954 into the early 1960s providing manganese for the U.S. government's Strategic Minerals Program. The project safeguarded 24 mine openings while preserving underground bat habitat. The mine workings provide very important winter hibernaculum and areas for summer nursery colonies for the Townsend's big-eared bat (*Corynorhinus townsendii*). Big brown bats (*Eptesicus fuscus*) and Fringed myotis bats (*Myotis thysanodes*) also use some mine features. [Socorro West post-construction report \(16 MB pdf\)](#)
